PERTH SKIN-CARE EXPERTS

Perth's first medispa owned and operated by a team of plastic surgeons.

Assure Medispa is Western Australia's first medispa owned and operated by a team of plastic surgeons. It was established in November 2008 by the surgeons of the Western Australian Plastic Surgery Centre to meet what they saw as a real need for a specialist, purpose-built medispa in Perth.

They felt that, as public interest in cosmetic therapy had grown, so too had the realisation that treatments such as chemical peels, wrinkle relaxers, microdermabrasion and IPL require high-calibre medical skill and experience.

A premium range of medical-grade cosmetic procedures are conducted in a state-of-the-art clinical facility by a team of medical aestheticians, registered nurses and highly experienced plastic surgeons. Only services, treatments and products that are medically endorsed and have medically proven outcomes are provided.

SERVICES INCLUDE:

- Beau Visage™ skin imaging
- Wrinkle relaxers and dermal fillers
- Pulsed light treatment (IPL) – skin rejuvenation, permanent hair reduction, wrinkle reduction
- Chemical peels/medi-facials
- Pre- and post-operative care
- Microdermabrasion
- Photonlite therapy (LED)
- Titan skin tightening
- Medical skin needling
- Medical-grade skincare products, cosmeceuticals and Obagi products
- Pharmaceutical-grade Glo Minerals™ make-up

Most of Assure Medispa's clients opt for a blend of treatments to deliver maximum results. Many want to reduce the signs of premature ageing, add vibrancy to their appearance, repair damaged skin or manage hair reduction. Typically, Assure Medispa's clients are those who are interested in improving their appearance and want healthier skin, but may not want surgery (or for whom surgery may not be appropriate).

No other medispa facility in Western Australia offers the specialist medical experience and expertise of Assure Medispa and its team of seven surgeons.

BEFORE AND AFTER

Amy sought help from Assure Medispa to address concerns about her pitted acne scarring and occasional breakouts, as well as wrinkling on her forehead. An assessment was conducted and a six-week medi-plan developed by Assure Medispa's specialists, which included:

- Home-care products from the Obagi physician-strength Nu-Derm system to strengthen and prepare the skin and to minimise breakouts.
- Micro-needling treatment to address the pitted acne scarring (a single treatment was undertaken, with the understanding that further treatments would be needed. A series of three treatments is recommended).
- Wrinkle relaxant on her forehead and glabella (between forehead and nose) to smooth out the wrinkles and enhance the new smooth skin look that the medical skin needling provided.

The results of Amy's treatment plan have been exceptional. Significant improvements are already visible, which will be further enhanced with additional micro-needling and follow-up care by the team at Assure Medispa.

Suite 216, 25 McCourt Street, Subiaco WA.
